PREFACE.

In compliance with the request of a deputation of Yacht Owners and others interested in yachting, the Committee of Lloyd's Register of Shipping determined in 1877 to provide a Register for the faithful and accurate Classification of Yachts and to adopt Rules and Regulations applicable to this description of vessel.

The Register of Yachts, which is printed solely for the use of Subscribers, is issued annually, and a supplement containing additions and corrections is usually issued during the year.

The Register of Yachts contains the names, particulars and characters of Yachts classed by the Society, together with the names and particulars of other Yachts so far as known, also a list of Yachts of the International Rating Classes built since the 1st January, 1920. The Appendix contains a List of the various Yacht and Sailing Club Officers and illustrations of their respective Flags, an illustrated List of the Flags of Yachts, an Alphabetical List of Signal Letters, a List of Yachts which have had Names Changed, a List of Yachts arranged according to tonnage, a List of Yacht Builders and Designers with the names of Yachts built or designed by them, an Alphabetical List of the Names and Addresses of Yacht Owners, with the Yacht Clubs to which they belong, and a List of Yacht Owners who have obtained Certificates as Masters.

It will be observed that, with a view to facilitate reference on the part of Foreign Subscribers, the List of Contents, the Key to the Register, the titles of the various sections of the Book and the headings of the columns are printed in French as well as in English.

Particulars of the larger American and Canadian Yachts are included in the Book with those of Yachts of other nationalities. A separate Register containing a complete List of American and Canadian Yachts is published in New York.

The Subscription to the Register of Yachts is Two Guineas per annum (or such other sum as the Committee may fix), for which one copy of the Book is supplied.

Rules for the Building and Classification of Wood, Composite, and Steel Yachts are also issued by the Committee of Lloyd's Register.

71, Fenchurch Street, London, E.C.3, *May*, 1925.

PREFACE.

Pour satisfaire à la demande d'une délégation de propriétaires de yachts, et autres intéressés dans le yachting, le Comité du Lloyd's Register of Shipping décida, en 1877, dans le but de permettre de donner aux yachts une classification fidèle et rigoureuse, de publier le "Yacht Register" et d'adopter des statuts et règlements applicables à cette catégorie de navires.

Le "Yacht Register," qui est uniquement publié pour l'usage des abonnés, paraît chaque année, et un supplément donnant les additions et corrections apportées au dit ouvrage est ordinairement publié dans le courant de l'année.

Le "Yacht Register" donne les noms et les cotes, avec d'autres renseignements, des yachts cotés par la Société et, dans la mesure du possible, les noms, avec d'autres renseignements, des autres yachts, ainsi qu'une liste des yachts de la Jauge Internationale, construits depuis le 1er Janvier, 1920. L'Appendice renferme : une liste des membres du bureau des yacht clubs et des sociétés de la voile, avec l'illustration de leurs pavillons respectifs ; l'illustration des pavillons des yachts, une liste alphabétique de signaux distinctifs ; une liste des yachts ayant changé de nom ; une liste des yachts d'après leur tonnage ; une liste des constructeurs et auteurs des plans, avec les noms des yachts construits par chacun d'eux, ou les noms des yachts dont ils ont fait les plans ; une liste alphabétique des propriétaires de yachts avec leur adresse et les différents yacht clubs dont ils font partie ; enfin une liste des propriétaires de yachts ayant obtenu des certificats de capitaine.

Pour permettre aux abonnés étrangers de consulter, utilement, le "Yacht Register," la table des matières, la table explicative, les titres des différentes parties de l'ouvrage et les en-têtes des colonnes, paraissent actuellement en Français aussi bien qu'en Anglais.

Des renseignements sur les plus grands des yachts américains et canadiens sont compris dans l'ouvrage avec ceux pour les yachts des autres nationalités.

Un registre distinct, contenant une liste complète des yachts américains et canadiens, est publié à New York.

Le prix de l'abonnement au "Yacht Register" est de deux guinées par an (ou tout autre prix qui serait fixé par le Comité), et l'abonné a droit à un exemplaire.

Les règlements relatifs à la construction et à la classification des yachts en bois, composites, ou en acier, sont également publiés par le Comité du Lloyd's Register.

71, Fenchurch Street, Londres, E.C.3, *Mai* 1925.

LLOYD'S REGISTER OF SHIPPING

AND THE

REGISTRO ITALIANO.

NOTICE.

In pursuance of the wishes of the Italian Government, an amalgamation was effected between the two Italian Classification Institutions, previously known as the Registro Navale Italiano, with headquarters at Genoa, and the Veritas Adriatico, with headquarters at Trieste, in order to establish one Italian register of shipping, under the name of the Registro Italiano.

An Agreement, which came into operation on the 1st April, 1922, has been arrived at between the new Registro Italiano and Lloyd's Register, with the object of facilitating the classification of vessels with both Societies in the interests of shipowners, shipbuilders and underwriters.

Under the terms of this Agreement, Italian shipowners, while securing the national classification for their vessels, will, at the same time, be in a position to have Lloyd's Register class with as little inconvenience and expense as possible.

With this object, the Agreement provides that each Institution will give every facility for the assignment of its classification to vessels classed, or intended to be classed, by the other Society, provided the standard of strength and security is not inferior to that required by its own Rules, each Institution reserving to itself the right of confirming the class by means of surveys by its own Surveyors.

In order to obviate delays and inconvenience to shipowners and shipbuilders, the surveys of the two Societies will, as far as possible, be held simultaneously, and the Surveyors of both Registers are required to co-operate in entire harmony, and to hold jointly the surveys which they have to carry out.

KEY TO THE REGISTER.

KEY TO LLOYD'S REGISTER OF YACHTS

SYMBOLS OF CLASSIFICATION, COLUMNS 10, 11 & 12.

(All Abbreviations employed in the Register are explained in the Alphabetical Key, page 72.)

100A — Character of Yachts built of Steel or Iron in accordance with or equal to the Society's Rules and Tables.

90A — Character of Yachts built of Steel or Iron in some respects deficient of the requirements of the Society's Rules for the 100A class.

A — Without a numeral prefixed, character assigned to Iron and Steel Yachts already built to which the Society's Rules do not apply.

A — Character of Wood or Composite built Yachts of the first class. The figures prefixed to the character thus, 18 A, 12 A, indicate the term of years for which the Vessel is at present classed. Figures placed within parentheses thus, (17)A, C(11), indicate the expired term of years — originally if on the first line, and on continuation or restoration if on lower lines.

A — Without a term of years indicates that the Yacht, though not built according to the Society's Rules, is considered worthy of the class assigned.

Lv A1* / Lv A1 — Characters assigned by the Underwriters' Register for Iron Vessels, now amalgamated with LLOYD'S REGISTER.

R — Character of Yachts built in accordance with the Rules for Yachts of the International Rating Classes both as regards scantlings and equipment. The figures prefixed to the character thus, 16 R, 14 R, in the case of Wood and Composite Yachts, indicate the term of years for which the Yacht is at present classed.

1 — The figure 1 after a character signifies that the Yacht is well and efficiently equipped (*see* Tables 24 & 25 of the Society's Rules for Yachts).

A line thus -- after the letter A, A or A signifies that the equipment is *not* in accordance with the Society's Rules.

In the case of Yachts classed R, the figure 1 for equipment is not employed, the equipment being required in these cases to be in accordance with the Rules for Yachts of the International Rating Classes before the class is assigned.

† — Prefixed to the class of a Yacht indicates that she is also classed in the Register Book for Merchant Ships, and that the scantlings are equal to the requirements of the Society's Rules for the same.

The figures under a Character denote the date when the Yacht was last Surveyed by the Society's Surveyors.

When the port and date of Survey only appear, without the Yacht's Character, the Character has expired or been withdrawn because a Survey prescribed in the Society's Rules has not been held, or on account of non-payment of fees.

✠ — This sign before a Character thus, ✠ 100A1, denotes that the Yacht has been built under Special Survey.

✠ — This sign before a classification record of Machinery thus ✠LMC ✠NE&B indicates that the Engines and Boilers or both (according to the record which follows) have been built under Special Survey.

—— / 5,01 — A black line with date underneath indicates that the Yacht's Character was expunged from the Society's Register of Yachts at the date mentioned because, on account of reported defects, the Yacht was not entitled to a Character.

SYMBOLS OF CLASSIFICATION, COLUMNS 10, 11 & 12—*continued.*

5,01 A red line with date underneath indicates that the Yacht's Character was expunged from the Society's Register of Yachts at the date mentioned because, on account of non-compliance with the Society's Rules as regards Surveys, the Yacht was not entitled to retain her Character therein.

... This sign indicates that the Yacht's class was withdrawn from the Society's Register of Yachts at Owner's request.

When the eleventh and twelfth Columns are left blank, the Yacht has never been Classed in the Society's Register of Yachts

EXPLANATION OF RECORDS IN THE REGISTER OF YACHTS.

Tonnage (column 4). The Thames Measurement tonnage appears in the Register in the case of every Yacht, and is printed below the official tonnages where these tonnages are given. The rule for computing the Thames Measurement tonnage is as follows:—From the length (measured from the fore side of stem to the after side of sternpost on deck) deduct the breadth, multiply this result by the breadth, and that product by the half breadth, and divide by ninety-four.

In the cases of Yachts which are officially registered, the official registered tonnage measured according to the law of the country to which the Yacht belongs is recorded in type like that shown at the side hereof.

204·51 (Net)
546·65 (Gross)

For some foreign Yachts, the tonnage which is recorded has been measured in accordance with British rules and is accepted under British law. In such cases, the fact is indicated by the use of italic figures, thus:—

204·51 (Net)
546·65 (Gross)

Dimensions (column 5). When the dimensions of a yacht are printed on the upper line provided for the purpose and not beneath dots, they are taken either from the vessel's Official Register or the Society's Surveyors' 1st entry report of survey.

In the case of unregistered and unclassed yachts the dimensions are placed beneath dots thus:— ... ...
32·0 | 7·5 | 4·5

The **length** recorded is the length measured from fore side of stem to aft side of stern-post on the range of the upper deck, except in the case of unclassed yachts which are officially registered as British vessels, when the registered length is recorded.

When two lengths are recorded the second is the water-line length.

When the length on the water-line only is given, the initials "W.L." appear below the length.

The **breadth** recorded is the extreme breadth.

The **depth** is taken from the top of floors to top of upper deck beams amidships.

Date of Build (column 7). The date of build recorded in the Register of Yachts, for yachts built under the survey of the Society's Surveyors, is the date when the yacht was launched, except for yachts built during 1903 and subsequently, in which cases the last date of survey for first entry of classification is recorded when such survey is completed within six months of the date of launching, but when the first entry survey is not completed within that period, six months later than the date of launching is then recorded as the date of build.

The date of build of engines and boilers is only recorded where the same differs from the date of build of the yacht, and, in these cases, the date appears in column 8.

Internal Combustion Engines (column 8)—

Alcohol Motor indicates an internal combustion engine using alcohol as fuel.

Gas Engine indicates an internal combustion engine using gas as fuel.

EXPLANATION OF RECORDS IN THE REGISTER OF YACHTS—*continued.*

Oil Engine indicates an internal combustion engine using heavy oil such as Astatki, Mazut, etc., as fuel.

Paraffin Motor indicates an internal combustion engine using refined oil with a flash point higher than 73° F., such as Paraffin oil, Kerosene, Solar oil, etc., as fuel.

Petrol Motor indicates an internal combustion engine using highly volatile oils, such as Benzoline, Gasoline, Petrol, etc., as fuel.

Nominal Horse Power (column 8). The formulæ from which the Nominal Horse Powers of Steam Reciprocating Engines are calculated are :—

1. In cases of yachts in which the particulars of boiler pressures and surfaces are known :—

$$\text{NHP} = \frac{P+340}{1000}\left(\frac{D^2\sqrt{S}}{100}+\frac{H}{15}\right)$$ where the boiler pressure is below 160lb.

$$= \frac{P+590}{1500}\left(\frac{D^2\sqrt{S}}{100}+\frac{H}{15}\right)$$ where the boiler pressure is 160lb or above.

For determining the Nominal Horse Power of Steam Turbine Engines $\frac{SHP}{6}$ is to be substituted in the above formulæ for $\frac{D^2\sqrt{S}}{100}$, where SHP. is the total Shaft Horse Power.

If the boilers are fitted with Forced Draught or Induced Draught appliances, then $\frac{H}{12}$ is taken instead of $\frac{H}{15}$.

2. In cases where particulars of the boiler pressures and heating surfaces are not known :—

$$\text{NHP} = \frac{D^2\sqrt{S}}{100}$$ for Triple and Quadruple Expansion Engines.

$$= \frac{D^2\sqrt{S}}{120}$$ for Compound Engines.

$$= \frac{D^2\sqrt{S}}{130}$$ for Single Engines.

In the above Rules, D = diameter of L.P. Cylinder in inches.
S = Stroke in inches.
H = Heating surface in square feet.
P = Working pressure in lb per square inch.

In vessels fitted with Diesel Engines :—

$$\text{NHP} = \frac{N\times D^2\sqrt{S}}{80}$$ in the case of single-acting engines of the 4 cycle type,

$$= \frac{N\times D^2\sqrt{S}}{40}$$ in the case of single-acting engines of the 2 cycle type,

$$= \frac{N\times D^2\sqrt{S}}{20}$$ in the case of double-acting engines of the 2 cycle type,

where D = diameter of cylinder in inches, S = stroke of piston in inches in ordinary reciprocating engines, = twice the stroke of piston in the case of engines of the "Junker" type, N = number of cylinders.

In vessels fitted with internal combustion engines other than Diesel type :—

$$\text{NHP} = \frac{BHP}{3{\cdot}5}$$, where BHP is the Brake Horse Power at full power.

Asterisk * (column 9) before an Owner's name indicates that he has obtained the Board of Trade Certificate of competency as Master.

TABLE EXPLICATIVE CONCERNANT LE REGISTRE DES YACHTS.

MARQUES DE CLASSIFICATION, COLONNES 10, 11, & 12.

Toutes les abréviations, employées dans le Registre, ont leur définition dans la Table Explicative. (*Voir* **page 80.**)

100A Cote des Yachts, en fer ou en acier, construits conformément, ou d'une façon équivalente, aux Règlements et aux Tables de la Société.

90A Cote des Yachts, en fer ou en acier, construits, sous certains rapports, plus légèrement que les Règlements de la Société ne l'indiquent pour la cote 100A.

A Non précédé d'un coefficient, est une cote pour les Yachts, en fer ou en acier, déjà construits et auxquels les Règlements de la Société ne s'appliquent pas.

A Première cote des Yachts, en bois ou composite, dont l'armement est bon et suffisant. Le coefficient qui précède la cote, comme-ci : 18 A, 12 A indique le nombre d'années pour lesquelles le Yacht est actuellement coté. Le coefficient, placé entre parenthèses, comme-ci : (17) A C (11) indique les périodes expirées pour lesquelles le navire avait été coté. Placé à la première ligne, le coefficient indique la période originelle, aux lignes suivantes les périodes de continuation ou de restauration.

A Sans terme d'années, indique que le Yacht, quoique n'étant pas construit conformément aux Règlements de la Société, est considéré comme méritant la cote assignée.

Lv A1* Lv A1 Cotes assignées pour les navires, en fer, par l'"Underwriters' Register" actuellement fusionné avec le "Lloyd's Register."

R Cote des Yachts construits conformément aux Règlements de la jauge internationale tant comme échantillons que comme armement. Le coefficient qui précède la cote, comme-ci : 16 R, 14 R, dans le cas des Yachts en bois ou composite, indique le nombre d'années pour lesquelles les Yachts sont actuellement cotés.

1 Le chiffre 1, à la suite d'une cote, indique que le Yacht a un armement bon et suffisant. (*Voir* Tableaux 24 & 25 des Règlements de la Société pour les Yachts.)

Le chiffre 1, à la suite des lettres A, A ou A, indique que l'armement est conforme ou équivalent aux Règlements de la Société.

— Ce signe, à la suite des lettres A, A ou A indique que l'armement n'est pas conforme aux Règlements de la Société.

Pour les Yachts cotés R, il n'est pas fait usage du chiffre 1 pour l'armement qui doit, obligatoirement, être conforme aux Règlements de la jauge internationale avant que la cote puisse être assignée.

† Ce signe, précédant une cote, indique que le Yacht est aussi coté dans le "Register Book," pour les navires marchands, et que ses échantillons répondent aux Règlements du "Lloyd's Register" pour cette dernière catégorie de navires.

Les chiffres, placés sous une cote, indiquent la date de la dernière visite passée par les inspecteurs de la Société.

Quand le port et la date de visite figurent sans la cote du Yacht, cela indique que la cote est expirée ou qu'elle a été rayée, soit parce qu'une visite prescrite par les Règlements de la Société n'a pas été passée, soit parce que les honoraires n'ont pas été payés.

MARQUES DE CLASSIFICATION, COLONNES 10, 11, & 12—*suite.*

✠ Ce signe, précédant une cote, comme-ci : ✠100A1 indique que le Yacht a été construit sous surveillance spéciale.

✠ Ce signe, précédant une annotation de classification de Machines, comme-ci : ✠LMC ✠NE&B indique que les Machines, ou les Machines et les Chaudières, suivant l'annotation, ont été construites sous surveillance spéciale.

5,01 Une ligne noire, avec date au-dessous, indique que la cote du Yacht a été retirée du Registre des Yachts de la Société, à la date indiquée, le Yacht ne pouvant conserver sa cote par suite de défectuosités signalées.

5,01 Une ligne rouge, avec date au-dessous, indique que la cote du Yacht a été retirée du Registre des Yachts de la Société, à la date indiquée, le Yacht ne pouvant conserver sa cote par suite de dérogations aux Règlements de la Société en ce qui concerne les visites.

... Ce signe indique que la cote du Yacht a été retirée du Registre des Yachts de la Société à la demande du propriétaire.

Quand les Colonnes 11 et 12 sont laissées en blanc, cela indique que le Yacht n'a jamais été coté dans le Registre des Yachts de la Société.

EXPLICATIONS DES ANNOTATIONS DANS LE REGISTRE DES YACHTS.

Jauge (colonne 4). La jauge de la Tamise figure dans le Registre pour chaque Yacht et est imprimée au-dessous des jauges officielles, quand ces jauges sont données. La règle, pour calculer la jauge de la Tamise, est la suivante :— Prendre la longueur sur le pont, depuis la face avant de l'étrave à la face arrière de l'étambot et en déduire la largeur, puis multiplier le résultat obtenu par la largeur et ce dernier résultat de nouveau par la moitié de la largeur et diviser par quatre-vingt-quatorze.

Pour les Yachts ayant un acte de Nationalité, la jauge officielle, mesurée suivant la loi de la nation à laquelle les Yachts appartiennent, figure en caractères comme ci-contre : 204·51 (Net) 546·65 (Brut)

Pour quelques Yachts étrangers, la jauge qui figure a été mesurée conformément aux Règlements Britanniques et acceptée sous la Loi Britannique. Dans ce cas, la jauge figure en italique, comme ci-contre : *204·51* (Net) *546·65* (Brut)

Dimensions (colonne 5). Quand les dimensions d'un Yacht sont imprimées à la ligne supérieure, réservée à cet effet, et qu'il n'y a pas de points au-dessus, elles sont prises, soit sur l'acte de Nationalité du Yacht, soit sur le rapport de Inspecteur de la Société, pour l'entrée en cote.

Pour les Yachts sans acte de Nationalité ou non cotés, les dimensions figurent sous des points, comme-ci :— ... 32·0 | ... 7·5 | ... 4·5

La **longueur** qui figure est mesurée, sur le pont, depuis la face avant de l'étrave à la face arrière de l'étambot, sauf pour les yachts non cotés, qui sont enregistrés officiellement comme navires anglais, et, dans ce cas, c'est la longueur enregistrée qui est indiquée.

Quand deux longueurs sont indiquées, la seconde est la longueur à la ligne de flottaison.

Quand seulement la longueur de la ligne de flottaison est indiquée, les lettres " W.L." figurent au-dessous.

La **largeur** qui figure est l'extrême largeur.

Le **creux** est mesuré, au milieu du navire, depuis le dessus des varangues au dessus des barrots du pont supérieur.

Date de Construction (colonne 7). La date de construction, qui figure dans le Registre des Yachts, pour les Yachts construits sous la surveillance des inspecteurs de la Société, est celle du lancement, si les Yachts ont été construits avant 1903. Pour les Yachts, construits depuis 1903 inclusivement, c'est celle de la dernière visite d'inspection pour l'entrée en cote, à condition que la dite visite soit passée dans les six mois que suivent la date du lancement. Si l'inspection, pour

EXPLICATIONS DES ANNOTATIONS DANS LE REGISTRE DES YACHTS—*suite.*

l'entrée en cote, n'est pas terminée durant la période stipulée, la date de construction prendra cours six mois après le lancement.

La date de construction des machines et des chaudières ne figure que lorsqu'elle diffère de celle de la construction du Yacht, et dans ce cas elle figure dans la colonne 8.

Yachts Automobiles (colonne 8) :—

"**Alcohol Motor**" indique une machine à combustion intérieure utilisant l'alcool comme combustible.

"**Gas Engine**" indique une machine à combustion intérieure utilisant le gaz comme combustible.

"**Oil Engine**" indique une machine à combustion intérieure utilisant des huiles lourdes comme combustible telles que Astatki, Mazut, etc.

"**Paraffin Motor**" indique une machine à combustion intérieure utilisant, comme combustible, des huiles raffinées ayant un point d'inflammation supérieur à 23° C. telles que pétrole, kerosene, solar, etc., etc.

"**Petrol Motor**" indique une machine à combustion intérieure utilisant des huiles extrêmement volatiles, comme combustible telles que Benzoline, Gazoline, Essence, etc.

Force en Chevaux nominaux (colonne 8) :—

1°. Pour les Yachts pourvus de machines alternatives à vapeur, si les pressions et les surfaces de chauffe sont connues :—

$$\text{NHP}=\frac{\text{P}+340}{1000}\left(\frac{\text{D}^2\sqrt{\text{S}}}{100}+\frac{\text{H}}{15}\right)$$ pressions au-dessous de 160 livres.

$$\text{NHP}=\frac{\text{P}+590}{1500}\left(\frac{\text{D}^2\sqrt{\text{S}}}{100}+\frac{\text{H}}{15}\right)$$ pressions de 160 livres et au-dessus.

Pour déterminer la force en chevaux nominaux des turbines à vapeur, $\frac{\text{SHP}}{6}$ est à substituer, dans formule ci-dessus, à $\frac{\text{D}^2\sqrt{\text{S}}}{100}$, où SHP est la force totale en chevaux à l'arbre.

Pour les chaudières à tirage forcé on devra substituer dans les formules ci-dessus, $\frac{\text{H}}{12}$ à $\frac{\text{H}}{15}$.

2°. Si les pressions et les surfaces de chauffe ne sont pas connues :—

$$\text{NHP}=\frac{\text{D}^2\sqrt{\text{S}}}{100}$$ Machines à Triple et Quadruple expansion.

$$\text{NHP}=\frac{\text{D}^2\sqrt{\text{S}}}{120}$$ Machines Compound.

$$\text{NHP}=\frac{\text{D}^2\sqrt{\text{S}}}{130}$$ Machines Simples.

Dans les formules ci-dessus

D = diamètre en pouces du Cylindre B.P.

S = Course du piston en pouces.

H = Surface de Chauffe en pieds carrés.

P = Pression de travail en livres par pouce carré.

Pour les navires pourvus de moteurs Diesel :—

$$\text{NHP}=\frac{\text{N}\times\text{D}^2\sqrt{\text{S}}}{80}$$ pour les moteurs à 4 temps et à simple effet,

$$=\frac{\text{N}\times\text{D}^2\sqrt{\text{S}}}{40}$$ pour les moteurs à 2 temps et à simple effet,

$$=\frac{\text{N}\times\text{D}^2\sqrt{\text{S}}}{20}$$ pour les moteurs à 2 temps et à double effet.

Dans les formules ci-dessus :—D = diamètre du cylindre, en pouces. S = course du piston pour les machines alternatives ordinaires, en pouces, = deux fois la course du piston pour les machines du système "Junker," N = nombre de cylindres.

Pour les navires pourvus de machines à combustion interne, autres que des moteurs Diesel :—

$$\text{NHP}=\frac{\text{BHP}}{3{\cdot}5}$$ formule dans laquelle BHP représente les chevaux en frein à toute force.

* Un astérisque (colonne 9) devant le nom d'un propriétaire indique qu'il a obtenu du "Board of Trade" un certificat de capacité comme patron.

INDEX TO DISTINGUISHING FLAGS.

INDEX TO DISTINGUISHING FLAGS.

INDEX SERVANT À DISTINGUER LES YACHTS PAR LEUR PAVILLON.

With a view to facilitate reference at sea, the Distinguishing Flags of Yachts have been arranged according to colours :—
1st, Red ; 2nd, Yellow ; 3rd, Dark Blue ; 4th, Green ; 5th, Light Blue ; 6th, Purple ; 7th, Chocolate ; 8th, Black.
Combinations of two or more colours generally follow the principal colour in the order above.
In Flags with vertical designs the colour next the mast is the principal colour ; in horizontal designs, the top colour.

"KELVIN-SLEEVE" MARINE ENGINES

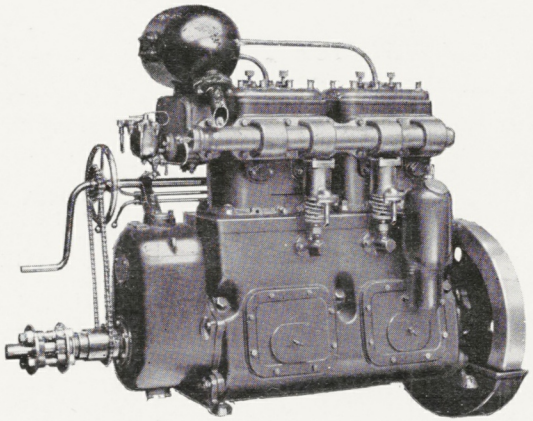
SILENT, POWERFUL, ECONOMICAL

IDEAL POWER UNITS

(PARAFFIN OR PETROL)

6 MODELS — 6 TO 60 H.P.

FOR MOTOR YACHTS
FOR MOTOR BOATS
FOR SAILING YACHTS



A Single Sleeve Valve within each Cylinder replaces the usual Poppet Valves, Camshafts, and Valve Gear.

Outstanding Advantages :—

SIMPLICITY and SILENCE.	Few working parts. The Sleeve Valve is noiseless in action and remains so.
EFFICIENCY and ECONOMY.	25 per cent. more power than Poppet Valve Engines of equal cylinder capacity and speed; 10–15 per cent. saving in fuel.
CLEANLINESS.	The whole Engine is oil-tight—a feature difficult of realisation where Poppet Valves are employed.

The KELVIN SLEEVE does it—no more noisy Valves and Gear.

OVER 190,000 HORSE POWER OF KELVIN AND KELVIN-SLEEVE ENGINES INSTALLED TO DATE.

Every Yacht-Owner

should instal the

VI-SPRING MATTRESS

and thus make the sleeping quarters of his yacht equally as comfortable as those of the most luxurious liners afloat.

For over fifteen years the leading Steamship Companies have made a special feature of using the Vi-Spring Mattress throughout their first and second class State-rooms, because it is indisputably the most comfortable and durable mattress made. For this reason also, hundreds of owners of every conceivable class of yacht have installed the Vi-Spring Mattress.

The Patent Springs and the separate pockets are the two outstanding features of the "Vi-Spring" Mattress which makes it so luxuriously comfortable. Their unique shape makes the small patent coppered-steel springs more soft and resilient than any others used for upholstery. These springs and the separate pockets in which they are encased ensures an independent resiliency to every part of the mattress. The "Vi-Spring" is an overlay mattress and must therefore be used on any of the usual supports, i.e. "Vito," Box Spring, Woven Wire, Elastic Edge, Chain, etc. Vi-Spring Cushions are constructed on the same luxurious principle.

The "PAGET"
RACE STARTING WATCH

PRICE £5 : 10 : 0

This watch is very popular with Yachtsmen. The dial, which is registered, shows at a glance precisely the minutes and seconds yet to elapse before the second gun, so that the yachtsman knows exactly how many seconds there are to elapse before getting into line.

This is an advantage over the ordinary stop watch, as the second's hand travels from 60 down to 1, and the minute hand travels from 5 to 1.

PRICE £2 : 10 : 0

As our firm has had so many enquiries from Yachtsmen and Motor-boatmen for a smaller "Paget," we have produced a baby "Paget" watch, which is slightly larger than a gentleman's ordinary pocket watch.

Money returned if either of these watches are not approved within seven days.

These Watches make very suitable Prizes for Competitions.
